Systematic reviews are the highest level of evidence when conducting a literature search. You can find systematic reviews in Cochrane using the Ovid database.

1. Access the “Cochrane Database of Systematic Reviews” on the library homepage.
2. In the search bar, enter your keyword(s), author, or title. Generally, there are not many Cochrane systematic reviews, so keywords can be a broad search on the major terms.

3. Scroll down to view your search results.

For a step-by-step tutorial on how to locate a systematic review in Cochrane, check out this video on YouTube: [https://youtu.be/gT_uODA_po8](https://youtu.be/gT_uODA_po8)
