Build A Search

PICO (or research) Question: ____________________________________________________________
____________________________________________________________________________________
____________________________________________________________________________________

Brainstorm search terms:

<table>
<thead>
<tr>
<th>Population</th>
<th>Intervention</th>
<th>Comparison</th>
<th>Outcome</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Now transform your keywords into a search query. Remember that each line should be one concept of your question, and that synonyms should be separated by OR. Put multi word phrases in quotation marks, i.e. “quality improvement”

(                                      ) AND
(                                      ) AND
(                                      ) AND
(                                      ) AND
