How to Do a Cited Reference Search in Ovid Medline

By Anna Do, May 2019

Cited reference searching is when you have an article and you want to see if anyone else has cited that article. Not every database has this feature, but Medline does.

1. Access Ovid Medline from the library homepage (https://library.mghihp.edu). Log into your Partners account if prompted to do so.
2. On the Ovid search page, make a title search for the article by clicking the “Title” button above the search bar.

3. Enter the first four or five words of the article and press “Search.”

4. Scroll until you find the article. Click “Find Citing Articles.”
5. If your article has been cited in Medline, you will be redirected to a list of articles that cited the article you searched for. This will be helpful because these articles might be related to your research topic.

For a step-by-step tutorial on how to do a cited reference search in Ovid Medline, check out our video on YouTube: [https://youtu.be/mc6UCXN0puA](https://youtu.be/mc6UCXN0puA)
