Finding stable links to articles is not always easy. Many of the library's databases make finding links complicated, so this tutorial will show you the easiest way to find stable links.

1. Visit the library website to access MGH OneSearch (https://library.mghihp.edu/). Find the article through a keyword search, or type the title of a known article into the search box.

2. Enter your Partners username and password, if prompted to do so.
3. When you find the article you need, click on the title.

4. Go to the right-hand toolbar and click “Permalink.”
